New Coler of 531S

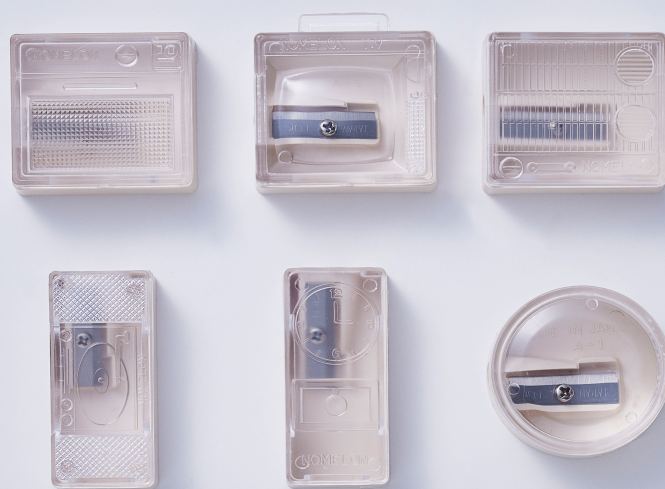

211 Long lead Pencil sharpener

The main parts are made of the Rice Resin and recyclable aluminum, and the sharpening unit is replaceable. The design is minimalist, with a form that is easy to pick up and sharpen, so that users can enjoy the act of "sharpening pencils" for a long time.

What is Rice Resin?

The use of biomass plastic derived from rice (inedible) reduces CO₂ emissions with a carbon neutral effect.

30 Home appliance Pencil sharpener by Rice Resin

This is a reprint of a 1960s model for the international market, giving it a 60s retro feel.
As a variation of the material, 20% "Rice Resin," a biomass resin derived from "rice," is used.

Television/ Microwave /Cooler /Record player Wall clock / Loupe

What is Rice Resin?

The use of biomass plastic derived from rice (inedible) reduces
CO₂ emissions with a carbon neutral effect.

15 Animal Pencil shrapener by Rice Resin

This is a reissue from the 1960s. The texture of the mold is deep and tasteful, as if it were hand finished. Rice Resin, a biomass resin derived from rice, is used as a new variation of the material.

What is Rice Resin?

The use of biomass plastic derived from rice (inedible) reduces CO₂ emissions with a carbon neutral effect.
